Introduction

Have you ever imagined an object as a best friend or even a family member in your childhood? When this kind of emotional sustenance is too dependent, this situation can be bad. On the surface, it fills the void in the heart, but more deeply, it is emotional. lack of security and lack of security. Our game is to recall the experience with the little master from the perspective of a "DOLL" who is emotionally sustenance. It uses a fantasy-colored approach to describe the process of the "DOLL" endowed with rich emotions gradually completing self-recognition and piecing together memories.
From the perspective of a doll, this game criticizes the loneliness and emotional loss caused by the lack of family companionship in childhood, as well as the personal safety risks caused by the lack of family care.

Elevator Pitch

"Finding Friend" is a third-person perspective role-playing three-dimensional puzzle game. It was inspired by our discovery that many children lack companionship, which not only leads to emotional loss and excessive attachment to toys, but also causes many dangerous accidents (such as fire) occurrence. Based on this phenomenon, we hope that our games can reflect reality and criticize this phenomenon. The game begins in the dream of the doll. After the doll opened her eyes, she was confused and found that she was alone, so the doll began to look for her best friend Sasha who used to accompany her. The clues that the doll got on the top floor actually showed that the two had separated. Gradually, the disharmonious furniture in the middle floor made her realize that she was small but her friend was very big. It was not until after exploring all the rooms that the doll slowly She realizes that she is not a human being. She has been burned in a fire, and her friend has already separated from her. The fire was caused by her friend knocking down a candle. So the doll imagined that her friend missed her very much, and in the dream, she searched for memories of growing up with Sasha, thereby exploring individual identity and self-discovery, and looking for the truth behind her friend being taken away. We hope to put the lack of companionship into perspective. The most real side of children is shown through the perspective of the doll, triggering thinking and thus improving this phenomenon.

Background

在儿童成长的过程中，有些孩子会将某件物品视为最亲密的伙伴，给这件物品赋予陪伴者的身份。这一现象涉及到孩童在成长过程中在感情上的需求和对陪伴的渴望。对于这种需求的忽视可能引起的各种问题，可能会对完整人格的成长产生影响以至于引起各种心理层面的问题。也有几率带来安全问题，孩童通常是缺乏常识和自我能力判断力的，烧烫伤事故、溺水

事故、高空坠落事故、触电事故等等，逐渐引起家长和教育者的关注。这件物品，比如玩偶。玩偶能提供孩童需要的情感支持，情绪安慰和陪伴，但过度依赖可能会产生心理层面和安全层面的负面影响。

Theme

In our game, players explore the dollhouse as "DOLL" and observe the world of a little girl who has excessive emotional dependence on "DOLL" from the perspective of "DOLL". From this special perspective, we hope to explore not only the special emotional relationship between "DOLL" and the little girl, but also the negative psychological impact and safety issues caused by this excessive emotional reliance. The purpose of the game is to inspire players to think about the causes and consequences while restoring the causes and consequences of the fire accident through piecing together clues in an immersive exploration.

We hope that through such an immersive plot game experience, we can point out possible problems and inspire players to think about the problem of over-reliance on emotions.

Target Audience

Age: 7 years and above
Puzzle game enthusiasts/story game enthusiasts/exploration and puzzle game enthusiasts

Game grading

This game is a PEGI level 7 game, our game contains features:
There is mild animation and fictional violence, and in-game conflicts are presented in a non-realistic or cartoon style to a very minor degree. The game contains some mild, not overly scary, horror elements. The game graphics and plot are humorous and present cartoon or micro-realistic styles, making them suitable for younger players. The game may contain some basic disruptive language, but does not involve offensive or insulting remarks. We have relatively simple and easy-to-understand gameplay, suitable for younger players to understand and operate.

Overview

People are motivated to maintain social connection with others, and those who lack social connection with other humans may try to compensate by creating a sense of human connection with nonhuman agents. This may occur in at least two ways-by and by increasing belief in

commonly anthropomorphized religious agents such as God, and anthropomorphizing nonhuman agents such as nonhuman animals and gad gets to make them appear more human. (Nicholas E, Scott A, Adam W, Joh T. C,) Such as dolls. 在童年时，很多人都曾有过将玩具或其他物品赋予情感寄托的经历，将它们视为亲密的伙伴，乃至家人的一部分，这种情感的寄托可能是情感空缺的一种表现，反映了内心深处对情感和安全感的渴望。

Game Story

The parents of the little girl Sasha were very busy at work. Until she was 6 years old, Sasha decided to celebrate her birthday by herself but accidentally knocked over a candle. She was anxious to take her most beloved doll with her, but before she could find the doll, she Picked up by the nanny. In fact, dolls and doll houses in reality have long been devoured or even burned by fire. Sasha has always treated the doll as a real little friend because she has no one to accompany her, and the doll has already grown into a soul with the company of its little master...

The game begins with the doll's dream. After the doll opened her eyes, she was confused and found that she was the only one. In her memory, her friend was taken away by others, so the doll began to look for her friend Sasha. The clues that the doll got on the top floor actually showed that the two had separated. Gradually, the disharmonious furniture in the middle floor made her realize that she was small but her friend was very big. It was not until after exploring all the rooms that the doll slowly Understanding that she is not a human being, she has been burned, and her friend has long been separated from her, so the doll imagines that her friend misses her very much, but in fact she does not know where her friend went and why she left her behind. she……

Conflict design

游戏中有轻微的恐怖元素，以及卡通形式的冲突。首先，贯穿整个游戏的火灾元素，这是一个严肃的话题，我们游戏目的在于强调关心孩童的安全问题和关于火灾的教育需要从小普及。父母经常对小孩说“不要触碰这个，有危险”，但会忽略解释为什么不能触碰，并且孩童对于危险没有一个清晰的认知。其次，游戏中设计茶壶作为一个怪物的形象，隐喻烫伤是现实经常出现却容易被忽视的情况。根据中国烧烫伤关爱公益基金提供的数据，在中国每年有2600 万人发生不同程度的烧烫伤，其中 30%以上是儿童。0-5 岁儿童烧烫伤占烧烫伤儿童的 70%，在烧烫伤儿童中，49%出现残疾，8%终身残疾。我们希望当玩家，特别是年纪小的玩家在我们的游戏中对火灾和烧烫伤有一个畏惧的心理。游戏将茶壶设定成为怪物，在造型卡通不造成恐惧的前提下，也在玩家心里留下对滚烫的茶壶的警惕心。

Design Creativity

研究表明，年幼的儿童会把他们对日常因果限制的理解移植到虚构的世界中（Harris，2000

年）。两岁的幼儿很容易想象出普通的结果--例如，假装茶水向下倒入杯中，或液体打湿被打翻的表面。此外，幼儿通常更喜欢发生普通事件的故事和声称是事实的故事，而不是发生超常事件的故事或声称是虚构的故事(Barnes et al., 2015, Sobel and Weisberg, 2014, Weisberg et al., 2013). 所以儿童的想象力在多大程度上受到他们对现实世界因果关系的了解，在本游戏中我们为儿童构建了一个偏向写实风格的故事。

家庭忙碌和亲子关系： 小女孩的父母非常忙碌，无法陪伴她度过生日。这反映了现代社会中，工作压力和繁忙的生活方式导致了家庭关系的疏离。亲子关系的缺失可能使得孩子们在寻找安慰和陪伴方面变得更为依赖娃娃等物品。

孤独与幻想（恋物癖和情感投射）： 小女孩将娃娃视为真正的小伙伴，这揭示了孩子在孤独时会产生对虚构世界的依赖，以弥补缺失的亲情。这也反映了在忙碌的家庭背景下，孩子们可能会通过幻想和创造性的方式来逃避孤独感。

火灾和心灵创伤：
因为小小的生日蜡烛从而导致大火吞噬了娃娃和娃娃屋，象征着家庭的崩溃和心灵上的创伤，同时结局高潮烧焦的存在。而火灾真正发生在生活中其实是一件十分严肃且不安的事件，但面对儿童游戏故事我们更多希望使用等儿童化幻想元素来关爱儿童的心理成长，而通过调研我们发现我国 17 岁以下的孩子中，有 3000 万，正在受情绪障碍和**行为问题**困扰，所以我们希望把面临情感缺少儿童最真实的一面展现给各位家长，而**情感缺少的儿童将会从中找到共鸣。**

在现实生活中，一些家庭可能因为各种原因经历困境，导致儿童面临心理创伤。这象征着现实生活中可能面临的灾难和困境。同时将反映社会中一些家庭可能经历的突发事件，以及人们在面对灾害时的无助感和对失去的哀悼。

身份认同与自我发现： 小女孩在梦境中逐渐发现自己不是人类，而是被烧焦的存在。这可以解读为对个体身份认同和自我发现的探索，社会中的个体常常在寻找自我认同的过程中面临着各种挑战，尤其是在家庭和身份的影响下。这里的娃娃反映社会中一些人在面对心理创伤时，通过改变自我认知来应对问题。

社交孤立与想象力（幻想与现实的界限）： 小女孩在梦境中体验到的孤立感以及她对朋友的幻想，这展示了现实与幻想之间的模糊边界。从而反映了现实生活中一些人在面对社交孤立时，可能通过想象力来创造一种安慰和联结的机制来逃避现实中的痛苦和孤独，以此创造出一种理想化的世界。

总体而言，这个故事通过娃娃作为物品的象征，通过引人入胜的梦境和现实的交错，探讨了家庭关系、孤独感、身份认同困惑等社会问题，以及一些人可能面临的恋物癖情感投射及幻想的渴望。这个游戏提供了一个触发思考的平台，引导玩家深入探讨和理解社会中存在的复杂心理和情感问题。

Game Design

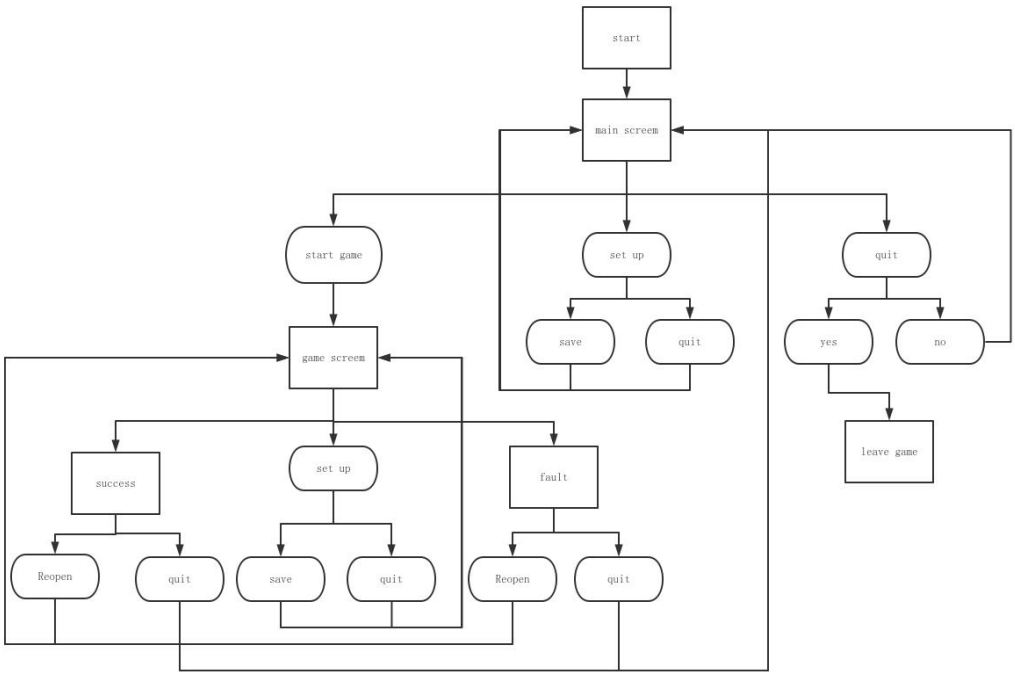
Game Flow

The goal of the game: Find "friends" and piece together clues.

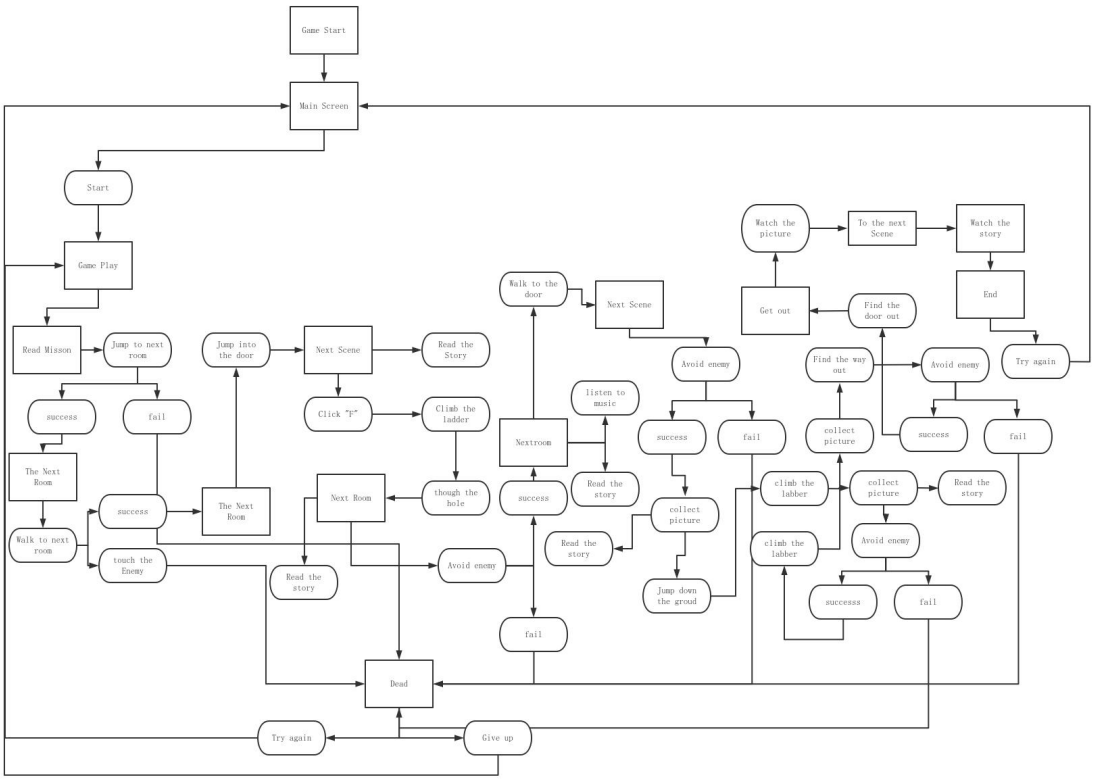
Conditions for passing the game: Collect three paintings to open the door, and find the last large picture frame after going out.

Game death conditions: encountering the teapot monster or falling from the pillar.

Menu details:



Game flow:



Specific game process

整个娃娃屋分为上中下三层。上层有两个房间和一座花园，玩家首先出现在最左面的花园中，行进路线是从左到右的。玩家在跳跃高矮起伏的花坛和石柱组成的道路，通过联通的门到达第二间房间，这间房间里东倒西歪的摆放着一堆零零散散的东西，看起来像是匆忙赶路时撞倒的。玩家在物品上跳跃着躲避茶壶怪物时，会触发道路上“倒立的台灯”，对话:“我的朋友慌里慌张的跑来找我，不小心打翻了台灯，她在哭，她在害怕，我好想去帮帮她……”通过打开的窗户到达第三间房间，这是一间摆满玩具的卧室，继续从右往左走会触碰小木马引发对话：“这是我和我的朋友最爱玩的小木马，她带着我可以在上面晃很久……话说她这几天怎么不来和我一起玩了呢？”。接着往前走会在上层娃娃屋的尽头发现一张巨大的倒在地面上的画框，画框里有四个区域，只有一个区域底下是空的，玩家要找到这个正确的区域跳到

娃娃屋的第二层。

玩家到了娃娃屋第二层，这一层也是有三个房间，玩家从上层最左边掉到二层后，从左向右探索房间。玩家在探索中进入特定区域会触发对话。第一间房间中是散落在地上的书，“我最爱听我的朋友讲故事了，她不喜欢故事书上的结局，就会涂涂改改成自己编的结尾，我更喜欢她编的结尾。”第二间房摆放一些比例失衡的家具物品，在经过最大的椅子时会触发对话，“这张椅子很大，可以同时坐下我和我的朋友，平时我的朋友总是让我坐椅子而她却不坐说太小了坐不了。”第三间房摆放各种玩具，玩家在经过玩具堆时会触发对话：“我的朋友告诉我这些是玩具的玩具，这是什么意思呢……”

玩家打开门进入娃娃屋的底层，这层是一整个大房间，玩家有一个收集三幅画的任务。第一幅画在楼梯底下，会触发对话：“我好想念我的娃娃……她是我最好的朋友”，并按键收集画框。第二幅画在墙上，玩家可以通过搬运旁边的书籍垫在脚下碰到画框，触发：“我们给女儿买了几乎一模一样的娃娃，可她却说这不是她的朋友”。第三幅画在角落的墙上，可以利用旁边的扶梯上去收集画框，触发：“那个人家的女儿真是个不懂事的孩子，房子都烧成那样了还吵着要找她的娃娃。”当三幅画全部收集，会被立即传送到一扇门前，开门。

玩家开门后看到外面的世界，在四周探索会看到一个显眼的巨大相册，上面是小女孩抱着娃娃。触发对话：“我是谁”。

UI Design

Game Menu

We need to design the start, death and end interface for the game. In addition, at the beginning of the game, there must be operation guidelines, and the game fonts and plot pop-ups need to be designed.
The following is the specific UI production. In this part, the functions and functions of each UI interface and plot guidance will be explained in detail.

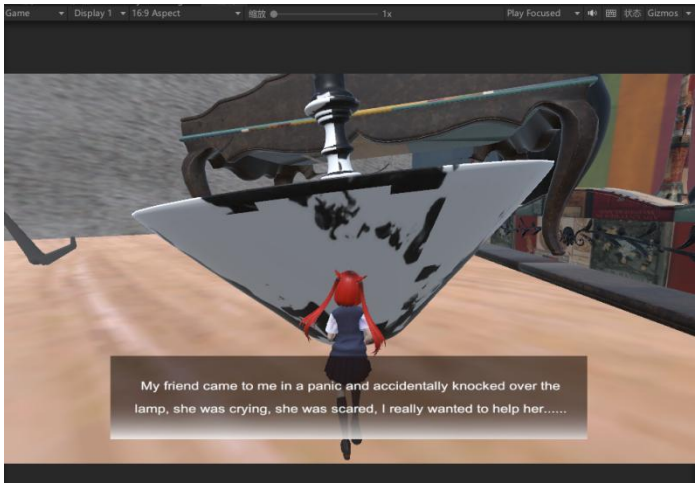
This is the operation guide, which will be displayed for 5 seconds when the game starts.

This is the mission guide, which tells the player their main mission.

UI Detailed

This is the starting interface, where players start the game.

This is the failure interface. Players will enter this interface after failure. Here players can choose to start over or return to the main interface



Game

Gizmos
My friend came to me in a panic and accidentally knocked over the lamp, she was crying, she was scared, I really wanted to help her.....

We bought our daughter an almost identical doll, but she said it was not her friend

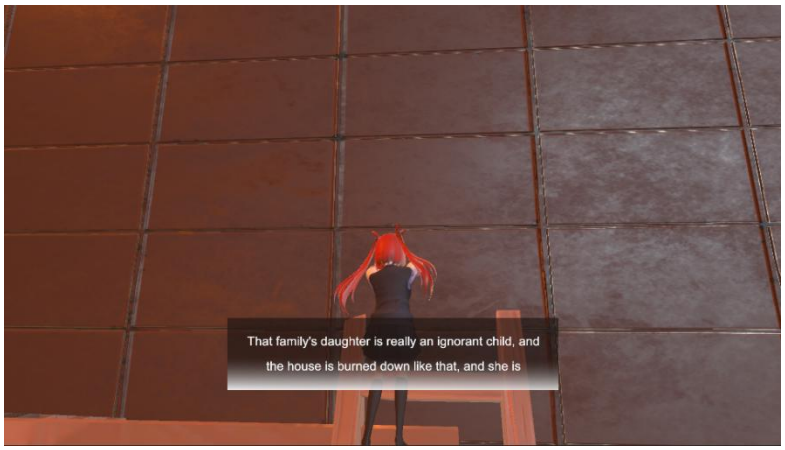
This is my friend's favorite little wooden horse, and she can hang on it for a long time..... Anyway, why didn't she come to play with me these days?

This chair is big enough to sit me and my friend at the same time

My friend told me these were toys of toys, what did that mean.....

I miss my doll so much... She is my best friend.

We bought our daughter almost identical dolls, but she said it wasn't her friend



That family's daughter is really an ignorant child, and the house is burned down like that, and she is

The above are the story UI in the game, which will be displayed to the player bit by bit as the game is played.

This is the player's thinking at the final frame, and they reach the final truth through interaction.

This is the end screen of the game, where players can return to the start page and choose to enjoy the game again.

Controls

Control method:

Keyboards W, A, S, and D respectively correspond to the player's movement, forward, left, backward, and right.

Spaces are jumps

The right mouse button closes the task menu
The left mouse button opens the task menu
F is the button for going up the ladder and leaving
E is the button for collecting paintings

Scene Design And Art Style

这是一个奇幻的游戏世界。游戏通过创建一个一致的由虚到实、虚实变换的氛围，将场景与游戏的故事情节紧密结合，使玩家在游戏中感到沉浸。由虚到实的场景应该反映主控逐渐清醒的内心，并为玩家提供足够的信息，让他们更深入的了解游戏世界的背景。娃娃屋的每一层风格都有变化，提供多样化的场景，避免让玩家感到单调。层层递进的线索可以保持玩家的兴奋与好奇。玩家需要探索每个区域，在每一个小场景里都有可交互的物品。有可以操作的物品，线索中隐藏的秘密，一直在追击的茶壶怪。从上层到下层有一个由虚幻到现实的风格变化，通过场景风格的多样性、照明效果和特殊效果，从视觉上增加玩家的体验。在场景中提供足够的引导，确保玩家知道他们应该去哪里，以及他们可以做什么。这些通过特定的物品和游戏界面上的 UI 来实现。

Top Floor

受《盗梦空间》,《爱丽丝梦游仙境》和 M.C.埃舍尔的启发，我们希望通过建立一些与主人公不和谐的家具，来展现学龄前儿童眼中娃娃屋随意无序的幻想布置，同时我们也曾想过把每个房间设计的过于抽象完全像梦境一样，但通过大量的观察我们发现，学龄前儿童的想象力是无限的，但他们的动手能力是有限的，他们的视角与想象力更多在于在平面空间的发挥，因为孩子眼中的世界不会像我们成人懂得各种物体应该摆放在哪里，所以我们将真实参考一个学龄前儿童眼中的视角使每一个场景和出口都出人意料，比如藏在地上的相框门等等，从而帮助主人公离开娃娃家，寻找真相。

在顶层的三个房间是娃娃梦境的开始。灵感来源来自于马蒂斯的野兽派表现：“它们就像在

画布上十分随意地铺排展开；简直就是一个孩子拿别人送他做礼物的颜料盒子，玩耍着天真粗俗而且十分幼稚的拼凑游戏。”在这里借鉴马蒂斯大胆的色彩表达，通过颜色的明暗度表现主观情感，鲜艳的颜色给人比较强烈的视觉感受，增加画面的视觉温度。选用对比强烈的色彩来强调娃娃梦境里的的独特氛围和情感体验。房间里混合明亮和深沉色调的组合，可以表达主人公逐渐接受成长和面对挑战的过程。色彩的变化可以在房间的不同区域之间流动，呈现出变化和发展的感觉，强调娃娃梦境的进化过程。其中红黄绿的主色调我希望来表达儿时的曾经的天真和快乐，以及与娃娃一起度过的美好时光。因为在这里故事的开头，色彩应该是充满活力和欢愉的。但因为是回不去的时光所以也将家具贴图进行了做旧的处理使其变成复古的艺术风格。此外卧室的墙壁和走廊的小门都进行了 3D 的细节化处理使其看上可以拥有景深的效果层次感更丰富，同时凌乱摆放的家具和藏在地上的门框通关口是我为玩家设计的惊喜，事实上凌乱摆放而做旧的家具和这样本该温馨的房间本质上是冲突的，它象征着那段回不去的记忆，更为后边的火灾进行了铺垫，这给玩家留下了悬念，从而可以更好的感受到房间设计的好奇而进入游戏主题。

Middle Floor

而在中层中则是一种温馨的氛围，采用暖色的灯光和童话风格的场景搭建。在离开顶层紧张的感觉后，这种温馨本身就是一种奖励。在场景中同时添加了可以互动玩耍的电子琴以及各式各样的玩具在中层你会感受到主角的一些生活真相，这种舒缓的剧情叙述，舒缓了玩家的心理，也激励了玩家寻找出去的道路，寻找真相。

Bottom Floor

在底层的空间是娃娃梦境的结束。灵感来源是 20 世纪初达达主义，追求的正是一种“无意义”的境界，是一种虚无主义的表现，正象征了娃娃一路上的无意义，侧面强调了现实世界的有意义。这种无意义以一种无序却又有序的环境勾勒出娃娃内心的挣扎。无序的场景带来了有序的游戏流程。古怪的茶壶怪也强化了这种无序，从何而来，到哪里去，这种未知的敌人体现出了世界的不真实。无形的空气墙也非理性的指引了一种有序的游戏流程，这种非理性中的有序也是一种无序的体现。三幅画看似背后深藏故事，内里却是无意义的收集，因为无需收集即可离开房间，整个场景便是一种无意义的故事，包括了玩家要完成的任务。这一切指向了一个源头那就是梦境和虚拟，拥抱现实才是真正的意义，虚拟的人生是无意义的是非理性的。这正是我们想表达的观点。最后离开房子，找到画作，认清现实正是我们想告诉玩家的，缅怀过去，沉湎虚拟是无意义的，只有认清现实，目光向前才是理智正确的。

Fun

在顶楼，玩家获得的激励往往是通过了一种刺激感，在茶壶追逐，和艰难的跳跃中获得的一种心理上的奖励与激励。同时在中间的剧情也是给玩家心理上的舒缓，为之后的紧张追逐起到一种衬托的作用。
而在中层中则是一种温馨的氛围，在离开顶层紧张的感觉后，这种温馨本身就是一种奖励。在中层你会感受到主角的一些生活真相，这种舒缓的剧情叙述，舒缓了玩家的心理，也激励了玩家寻找出去的道路，寻找真相。
在底层你会得到出去的线索，而每找到一幅画就会得知一个小故事，这就是对于玩家的一种激励，一种奖励，会激发玩家的好奇心，让玩家向往房间外面的世界。
在游戏的过程中，不仅有除了主线之外的空间可以探索，还有隐藏的彩蛋。在顶层，有一排有跳跃难度的柱子，可能需要尝试几次才能跳过。在中间层的玩具房中有可以互动的玩具琴。

Character Design

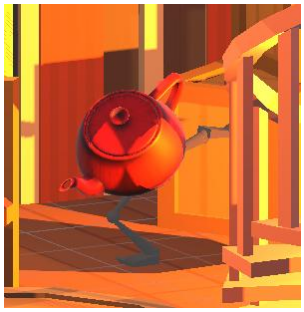
Doll Information

Doll is our main character.
Name：Maria
Appearance：大约 15 厘米大小的布娃娃，手工制作，触感柔软，外表看起来有些旧了。
布娃娃拟人：五岁左右的小女孩，开场出现在一座不协调的花园里。粉色的长头发，时常是笑眯眯的。是一个勇敢的小女孩，很重视友谊。不怕疼，即使从很高的地方跳下来也没事。害怕朋友口中的装满水的滚烫的茶壶怪。当她有意识的时候就发现自己出现在花园里，她是谁，但她记得她有一个很好的朋友，这里是她们共同的世界，她要去探索其他房间寻找她的朋友。随着每个房间的探索，她有时会想起一些片段。一开始是她和她的朋友一起玩乐的场景，夹杂着莫名的哭喊，火焰灼烧的烟灰。渐渐的她的脑海中她自己逐渐缩小，她的朋友逐渐放大，伴随着比例失衡的世界，有什么真相呼之欲出。最后，在这分不清是现实还是虚幻的世界中，她看到了和她分别的朋友，朋友对她的想念和一定要找回来的执念。娃娃明白了她们的友谊是对等的，在走出娃娃屋的一瞬间，她明白了一切，她也不复存在。

小女孩是我们的重要角色。
名字：Sasha
Appearance:四五岁的小女孩，有着金色柔软的头发，爱穿蓝色的连衣裙，性格安静，有创造力，想象力丰富。
剧情介绍：父母忙于工作，家里只有保姆，很少有人带她出门结交同龄小朋友。小女孩经常一个人在卧室里玩玩具，由于缺少父母的陪伴和关心，将自己改造过的布娃娃当作自己的好朋友弥补情感上的缺失。在生日这天，她拒绝了保姆的陪伴，想自己和娃娃过生日，结果在点燃生日蜡烛时发生了意外，蜡烛倾倒很快点燃了桌布、窗帘、抱枕……

Enemy Information

Appearance：卡通式样的茶壶，圆滚滚的身体和幽默式的走路方式以温和的方式代表敌人，但红色的外表和沉重的脚步声同时代表危险引起警惕。
小女孩因为曾被它烫伤过，所以它成为小女孩最害怕的事物。它也成为娃娃唯一从小女孩口中接触到的来自外界的令人害怕的事物。



Project Planner

Project General Manager

Huili Liu :Responsible for the overall distribution of tasks and participated in the design of gameplay and game story, GDD and PPT production and modification , and the production of game art (including partial scene construction, 2D/UI art and video)

Marketing director

Yiqi Liu:有较强的建模能力和市场调研能力以及文字组织能力。负责游戏的二楼场景制作，怪物的设计与动画，市场调研，用户的深入交流和商业发展。我将创造新的方式让我们的游戏更好发行。

Creative Director

Luchun Xu:Strong creativity and artistic guidance, responsible for the revision and integration of the game theme and story. She is also responsible for character modeling and 2D design. At the same time, she edited the presentation and GDD.

Chief Programmer

Shi Zhang: Responsible for the underlying scene construction and gameplay production. Responsible for some code writing. Responsible for part of the game process design. Responsible for describing part of the plot. Responsible for some bug fixes.

Marketing

We follow the MAYA Principle and maintain the most acceptable and advanced attitude to balance the freshness of the players, so we have added some fantasy adventure gameplay and scenes to the game, as well as a fantasy story waiting for players to decipher. Because too much familiarity can make consumers lose interest. We realize consumers want something new (something they're not tired of yet), but also something familiar (something recognizable so they know what it is). So at the same time, we will retain the easy-to-use traditional game mechanics,

that is, use the basic WSD keys to move around and explore the scene, trigger the story, get hints and find the exit. Some props can interact with the rules. Players interact to enter the space and find the exit.

Marketing Direction	Marketing Program	Marketing Details
Digital Distributions	Build our own personalised brand to make video game publishing.	Using new media apps for advertising video campaigns.

Digital Distribution and Analytics

Establish our own personalized brand to publish electronic games and use new media apps for advertising and video promotion.

In order to improve the efficiency and competitiveness of our game publishing industry, we hope that game publishers can optimize the game publishing process. Through process optimization, game publishers can better control the standardization process, thereby improving the quality and user experience of games and helping the electronic game industry expand.

At the same time, with the development and application of intelligent technology, we hope that game publishers can better control and manage game processes and data, thereby better improving game quality and user experience.

Develop virtual reality technology (user-friendly)

Here we need to focus on user interaction experience. Due to the particularity of virtual reality technology, users may encounter problems such as motion sickness, vertigo, and tactile delays. Therefore, we will take some measures to solve these problems, such as optimizing graphics rendering performance, reducing delays, and handling frame rate drops.

Secondly, visual design is very important in developing user-friendly VR applications because visual effects will directly affect the user's experience and sense of participation. In order to ensure user-friendliness, first of all, the design of our game scenes conforms to the rules of visual communication, which can reduce users' visual fatigue and discomfort. Secondly, the design of the virtual scene needs to take into account the user's perception and adjustment ability, so in the game scene we have also optimized the moderate sense of depth and distance. At the same time, each of our virtual furniture in the game scene is designed with reference to the texture of real furniture, which is very realistic, allowing players to have a more real and natural experience.

Closely related to visual design is performance optimization. High-quality graphics and smooth motion are crucial when users use virtual reality applications. To improve performance, we optimize VR applications by using efficient graphics rendering techniques such as deferred rendering and volumetric lighting. Second, we reduce the complexity and detail of the field of view in the gaming environment to improve application responsiveness. In addition, our game scenes make reasonable use of hardware resources, where the computing power of the graphics processor (GPU) will accelerate the rendering and physical simulation of our graphics.

In addition to performance optimization, our game applications are easy to pick up and use, and we provide good user guidance and feedback in every user interface. To improve usability, first, we provide clear operating guides and tutorials so users can get started quickly. Secondly, we have an intuitively designed user interface that uses large buttons and simple menus. Finally, we will provide timely feedback on each interface, such as prompts to inform users whether their operations were successful.

To summarize, we focus on aspects such as user interaction, visual design, performance, and usability. By optimizing the user experience, providing good visual effects, optimizing performance while protecting player privacy, we believe that based on our current prototype status we will develop a more friendly, smart and attractive virtual reality version of the game for users Bring a better user experience.

Moved power away from the physical retailers (as well as online retailers selling physical versions of software)

Persona 总结

PERSONAL INFORMATION

Anna

- 15
- Junior high school student
- Plymouth
- Likes adventure drama games

PAIN POINTS

- A lot of games nowadays have more adult stories and scenarios, games for my age group are either too childish.
- I love playing with dolls, and around me dolls are the only thing I rely on because my parents are very busy, but there aren't a lot of doll themed type of games on the market.

EXPECATION

Find empathy in the game
Not be too childish with the gaming experience.
Hopefully there will be doll-themed games

USER EXPERIENCE GOAL

Closely
Immersive
Empathy

PERSONAL INFORMATION

22

University student

London

Like adventure puzzle games

Alex

PAIN POINTS

- I feel like I'm tired of a lot of adventure puzzle games on the market, so I'm hoping that there are games in this genre that are innovative in their scenarios and storytelling that will draw me in!
- A lot of games on the market have a fixed route, I hope this time I can explore on my own without following a fixed route, I hope this time I can come across different surprises of the game.

EXPECATION

Scene richness
Storytelling innovations
Be able to take the free route
Receiving Surprise

USER EXPERIENCE GOAL

Novelist, Director, Artist

Bristol

Likes dramatic games

Lynae

PAIN POINTS

- A lot of the resolution of episodic games is too rigid nowadays, I hope the game's story ending can be open-ended and somewhat creative, so that it might appeal to a wider range of artists.
- Nowadays, many games on the market have a lot of adult content and negative content, I'm worried about my children, so I hope that future games can be educational and have some depth!

EXPECATION

Hopefully the game has educational depth
Hope the game is simple and easy to play

USER EXPERIENCE GOAL

Comfortable
user-friendly
educational
In-depth
Artistry

In this game design, we conducted interviews with adventure game enthusiasts. We will use the opinions of the three personas mentioned above to adopt a doll theme. The gameplay is simple, so that players of different ages can find resonance in the game, and the game content will not be too Childish but more educational, players will experience an immersive story and scene experience in the game, and can touch specific objects to find story clues at any time during the game. In addition, we are friendly to liberal players, and we welcome adventurous players. Players are free to explore the details of the room and find the surprises we designed for them.

Situation Analysis

对于游戏商，如何变现，一直是游戏开发商和运营商关注的核心问题，而传统游戏盈利主要依靠下载收费，道具交易等。在我们观察的中国的游戏消费环境中，大多数的游戏参与者并不愿意为游戏“买单”，那将成本转接给花钱做广告的广告主，应该是对游戏商、用户、品牌商三者来说相对平衡的一种方式。

所以很多时候对于广告商，生硬的直接营销未必有效，品牌正在将 “游戏” 作为竞争的优势，游戏可以帮助商家提升品牌意识和推动用户参与度。在这里我们给广告主提供两种游戏化营销思路。第一种，在原本营销中学习游戏机制，将过程游戏化，甚至可以定制成 APP 游戏，第二种，和数款游戏合作，利用已有庞大用户基数，植入营销信息，策划符合游戏世界观的品牌任务，同时将游戏道具作为奖励机制刺激玩家的参与度。

Game peripherals

① First, design, produce and sell game peripheral products such as physical doll toys and mini doll houses, and cooperate with classic IP-related companies such as Mattel Barbie Company.
②After we have a certain amount of funds, we will produce game movies and cooperate with advertising film companies, and at the same time release a series of personalized beauty products based on dolls.

Market risk analysis

①The market competition is fierce
Currently, competition in the game publishing industry is fierce. Many large manufacturers and game companies have entered the game publishing industry. For small game publishers, it is easy to face market share compression and fierce market competition. Therefore, game publishers must Only by updating and improving our games in a timely manner according to market demand and user needs can we ensure our position in the market.
②Policy changes
As the country adjusts its policies and strengthens supervision of the game industry, the game publishing industry is also facing certain risks. According to recent data released by the China Press and Publication Administration, 23% of the country's "cultural and entertainment"

companies were "seriously non-performing" in 2019, of which the proportion of non-performing companies reached 46.5%. Policy uncertainty and adjustments will greatly affect the development of the game publishing industry.

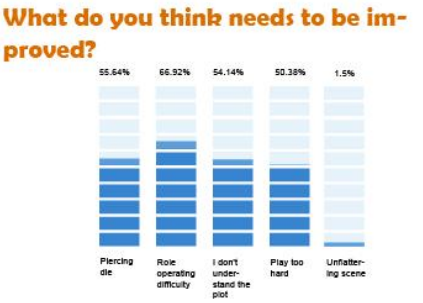
Conclusion

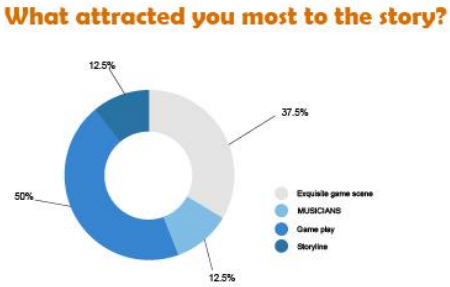
We will consider how children can engage with popular digital and social media in critical ways to understand their imaginative consumption and production, including how we as researchers can rethink our own imaginations of the trajectories of children's play (Burnett & Merchant, 2011). We need methods that are nuanced and broad enough to follow children into these intersectional imaginaries.

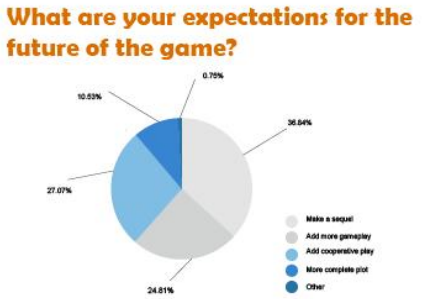
Due to the advancement of science and technology and the continuous innovation of Internet technology, opportunities and challenges faced by the game publishing industry continue to emerge. Relative to its current prototype state, we will continue to innovate and update our game in the future, follow market needs and user needs, seize the market and opportunities, and turn it into a complete video game to compete in the highly competitive game publishing industry to gain a foothold and grow stronger.

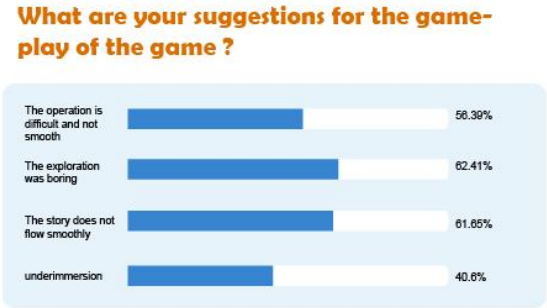
Questionnaire

This survey questionnaire was published online and a total of 157 valid responses were collected. Among them, 74 were males and 83 were females. The following are the key data.









Based on the feedback given to players, we have made changes to the issues raised by them， and according to the survey results, most people like our game and are willing to recommend it to others.

Project Schedule

10.6 Determine the initial content of the game:
The game starts with a fire caused by lighting candles on a girl's birthday. The player will play the girl's favorite doll. From the perspective of the doll, she thinks she is the girl's good friend. By exploring the scene, she slowly discovers that she is actually the girl's best friend. It's a doll and the truth that the girl left because of the fire.

10.27 Changes to the game concept:
Adding a fixed perspective and adding Easter egg gameplay We have partially modified the game story. We don't want the girl to really die due to the fire, so we have added a plot of the girl being rescued to the plot. But in the eyes of the doll, the girl was "snatched". So the doll's main goal changes to finding friends, and in the process of finding friends, she discovers that she is the doll and the truth about the fire. At the same time, we determined the name of our game: Finding friend.

11.6 Determine the game story and gameplay: After testing, we still think the game exploration process is boring, so we want to add teapot monsters to patrol some areas. The teapot patrolling back and forth is a reflection of the doll's inner fear. It is a symbol of something that the little girl had been burned on.we also Added task panel for game start
After the game starts, players can right-click to view the mission panel, which can help them understand what the mission is.

11.20 2D illustration completed
12.1 Complete most procedures
12.4 Invite players to try out games and get feedback
12.11 Complete game program production and edit promotional video
12.17 Packaging and integration
